SUMMARY:

IT Support Technician with hands-on datacenter operations and SOC support experience. Skilled in system monitoring, incident response, networking, and documentation. Known for fast issue resolution, strong troubleshooting, and clear communication with technical and non-technical teams. Currently pursuing CompTIA Security+ certification (expected 2025) to strengthen cybersecurity knowledge and advance into NOC/SOC or cloud support roles.

PROFESSIONAL SKILLS:

Operating Systems:

Windows Server, Linux (Ubuntu, CentOS), VMware

Networking:

STCP/IP, DNS, DHCP, VLANs, firewalls, VPNs, Cisco CLI basics

Ticketing Systems:

System performance monitoring, ticketing systems (ServiceNow), log analysis

Security Awareness & Best Practices:

Familiarity with NIST CSF, SOC2, security best practices

WORK EXPERIENCE:

SOC Technician

ScaleMatrix, San Diego, CA – March 2025 – Present

- Monitored and troubleshooted enterprise network and server infrastructure to maintain uptime.
- Responded to support tickets within SLA (avg. <5 minutes), reducing incident resolution time.
- Conducted root cause analysis on recurring outages, escalating complex issues to senior engineers.
- Documented infrastructure changes, incidents, and resolutions for knowledge base improvement.

Chip Runner

Oceans Eleven Casino, Oceanside, CA – June 2022 – December 2024

- Improved overall gaming experience by providing exceptional customer service to patrons while handling chip transactions.
 - Strengthened team efficiency through effective communication with dealers, managers, and other casino staff members.
 - Ensured customer satisfaction with timely and accurate chip exchanges at the cashier's cage.
-

EDUCATION:

West Coast EMT – 2023

EMT Certificate, San Diego, CA

CompTIA Security+ – Expected 2025

Cybersecurity Certificate – N/A
